Stair railings on p. 58

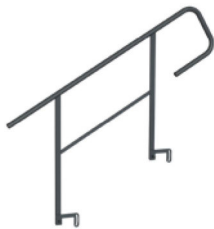

Step by step onto your stage

Mott offers suitable staircases for all mobile platforms. This ensures safety! Railings are also available - decide for yourself which stair variant you choose and whether you would like to add a railing to the staircase. Our access stairs are available in various designs. So, you can not only order the staircase in the right size, but also choose the design individually. We offer staircases made from individual steel elements. Another variant is the staircase made of individual platforms from the "Praktikus 750" model series, which are made of aluminum. The number of steps depends on the platform height. Special heights and widths are available on request. You can also choose other colors and coverings. Side panels provide a particularly attractive appearance.

Stair railings

Stair railings variabel (Indoor)*

with knee rail, steel parts (RAL 9005) deep black powder-coated suitable for staircase variable access (p. 59)

Dimension (cm)	Art.-No
