

# SCISSOR PLATFORMS

## UNIVERSAL

### Height-adjustable with hand and foot release

The mobile scissor platform "Universal" offers 5-fold height adjustment from 20-100 cm thanks to the Y-scissor fitting, which also enables inclined positions. It is available in two versions: with hand or foot release. The foot release with safety bar makes assembly easier, as the platform does not have to be turned over. The robust steel base frame ensures a high level of stability, and the easy handling enables quick assembly and dismantling. Ideal for flexible platform solutions with variable height requirements.

#### "Universal" at a glance

Area (W x D)	100 x 200 cm
Weight	from 64 kg (foot release), from 60 kg (manual release)
Usable area	2 m <sup>2</sup>
Stacking height	20 cm
Traffic load	up to 750 kg/m <sup>2</sup>
Height grid	20 cm up to 100 cm (grid width 20 cm)

Manual release: Unlock the fitting with the red lever and adjust to the desired height.

Foot release with safety catch for quick, comfortable and gentle positioning of the platform (height adjustment while standing).

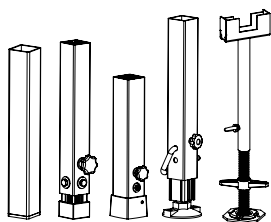

Optional: The welded-in center strut guarantees the stability of the Universal.

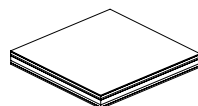

Optionally with anti-slip plastic foot
